# ASNT5079-KMC DC-20Gbps/14GHz Signal Phase Shifter with Linearized OB

- Broadband (DC-20*Gbps*/DC-14*GHz*) tunable data/clock phase shifter
- Delay adjustment range up to 280ps
- Exhibits low jitter and limited temperature variation over industrial temperature range
- 1GHz of bandwidth for the phase adjustment tuning ports
- Ideal for high speed proof-of-concept prototyping
- Fully differential CML input interfaces
- Fully differential CML output interface with 600mV single-ended swing
- Linearized data output for minimized undershoot/overshoot
- Single +3.3V or -3.3V power supply
- Power consumption: 1.6W
- Fabricated in SiGe for high performance, yield, and reliability
- Custom CQFP 24-pin package

Offices: 310-530-9400 / Fax: 310-530-9402 www.adsantec.com

## **DESCRIPTION**

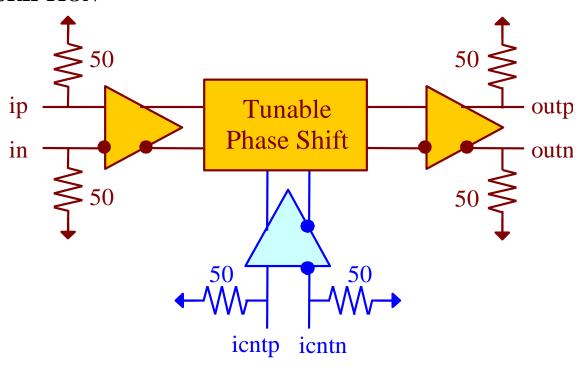

Fig. 1. Functional Block Diagram

ASNT5079-KMC is a data / clock variable delay line fabricated in SiGe technology. The IC shown in Fig. 1 provides an adjustable delay of its differential output signal outp/outn in relation to its broadband input signal ip/in. The delay adjustment range is temperature-stabilized. The delay is controlled through a wide-band differential tuning port icntp/icntn.

The part's I/O's support the CML logic interface with on chip 50*Ohm* termination to vcc and may be used differentially, AC/DC coupled, single-ended, or in any combination (see also POWER SUPPLY CONFIGURATION). In the DC-coupling mode, the input signal's common mode voltage should comply with the specifications shown in ELECTRICAL CHARACTERISTICS. In the AC-coupling mode, the input termination provides the required common mode voltage automatically. The differential DC signaling mode is recommended for optimal performance.

The output buffer is linearized for reduction of undershoot and overshoot on the output waveforms. Due to an extremely low jitter, the part is suitable for use in high-speed measurement / test equipment.

# **Delay Control Port**

The delay is controlled through a wide-band differential tuning port icntp/icntn. The delay control diagram is shown in Fig. 2.

## POWER SUPPLY CONFIGURATION

The part can operate with either a negative supply (vcc = 0.0V = ground and vee = -3.3V), or a positive supply (vcc = +3.3V and vee = 0.0V = ground). In case of a positive supply, all I/Os need AC termination when connected to any devices with 50Ohm termination to ground. Different PCB layouts will be needed for each different power supply combination.

## All the characteristics detailed below assume vcc = 0.0V and vee = -3.3V.

#### ABSOLUTE MAXIMUM RATINGS

Caution: Exceeding the absolute maximum ratings may cause damage to this product and/or lead to reduced reliability. Functional performance is specified over the recommended operating conditions for power supply and temperature only. AC and DC device characteristics at or beyond the absolute maximum ratings are not assumed or implied. All min and max voltage limits are referenced to ground.

Min **Units Parameter** Max Supply Voltage (vee) -3.6 VPower Consumption 1.8 W RF Input Voltage Swing (SE) 1.0 VCase Temperature  ${}^{o}C$ +90 Storage Temperature -40 +100 ${}^{o}C$ Operational Humidity 10 98 % Storage Humidity 98 10 %

## PACKAGE INFORMATION

The chip die is housed in a custom 24-pin CQFP package shown in Fig. 3. Even though the package provides a center heat slug located on the back side of the package to be used for heat dissipation, ADSANTEC does **NOT** recommend for this section to be soldered to the board. If the customer wishes to solder it, it should be connected to the **vcc** plain, which is ground for a negative supply or power for a positive supply.

Offices: 310-530-9400 / Fax: 310-530-9402 www.adsantec.com

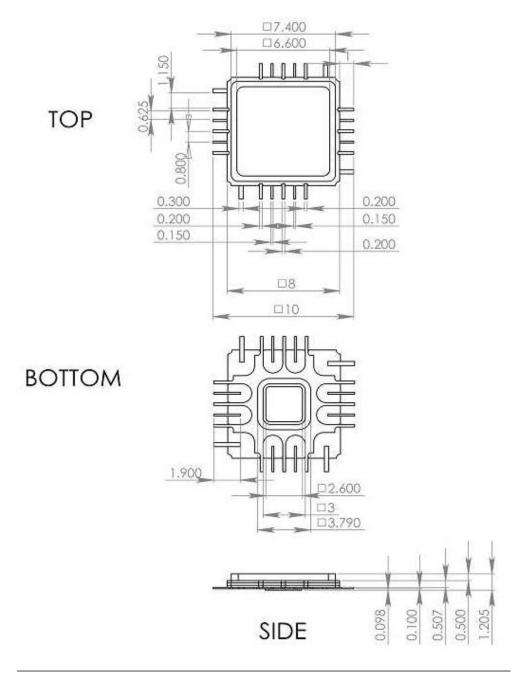

Fig. 3. CQFP 24-Pin Package Drawing (All Dimensions in mm)

The part's identification label is ASNT5079-KMC. The first 8 characters of the name before the dash identify the bare die including general circuit family, fabrication technology, specific circuit type, and part version while the 3 characters after the dash represent the package's manufacturer, type, and pin out count.

This device complies with the Restriction of Hazardous Substances (RoHS) per 2011/65/EU for all ten substances.
