

## XS-R1040-SMOD series 4Gb/s 850nm Surface Mount Optical Receiver Module

### Description

Intexys Photonics' single channel free space receiver module, operating up to 4Gb/s provides high density, high data throughput and a cost effective solution for free space optical data communication applications. Combining a 850nm photodiode and a transimpedance amplifier, in a small surface mount package, make this component easy and ready to use.
